CUSTOMER EXPERIENCE COMES FIRST

ABOUT US

Dear Valued partners and customers,

We are **New System Vietnam (NSV)**, a member company of Argo Graphic, a leading Japanese technology corporation. With over 20 years of experience in the Vietnamese market, we have been dedicated to providing industrial digitalization and system integration solutions for businesses. This gives us confidence to bring you a comprehensive and personalized solution, making the digital transformation process faster and easier.

We always believe in the principle "**Customer experience comes first**". With expertise in system integration services including computer, server and network construction and support, we have gradually expanded and focused more on providing product development solutions in 3D environments such as CAD, CAM, CAE and PLM at product development and production sites in the manufacturing industry. Our ultimate goal is to ensure that our customers have a great experience and are completely satisfied with our services, regardless of the size of the business.

At NSV, we are committed to bringing breakthrough solutions, supporting every step of the product development process from design, simulation, manufacturing to product lifecycle management. We create simplicity in the product development process for businesses - from initial idea to product launch to market. By combining creativity and advanced technology, we provide personalized solutions for each business, making the digital transformation process easier.

NSV is proud to be a gold partner and official distributor of Dassault Systèmes in Vietnam. At the same time, we are also recognized as one of the leading enterprises in the field of system integration and security. Our commitment is to bring absolute trust and peace of mind to customers when using our products and services.

Let NSV become a trusted partner to accompany customers on their digital transformation journey. We are willing to share our knowledge and experience to help customers achieve success in the most sustainable way.

Thank you very much for your interest and trust in NSV.

Kind Regards - New System Vietnam

Brand MESSAGE

Vision:

Become a leading trusted partner in providing digital solutions to support product development from design, simulation, manufacturing to product lifecycle management, helping to simplify the product development processes of businesses in the digital environment.

With more than 20 years of experience and a team of professional engineers, we are confident in providing personalized solutions, helping your business easily transform digitally quickly and effectively.

Mission:

At NSV, we have a mission to accelerate digital transformation of your business.

“
ACCELERATING
DIGITAL TRANSFOR-
MATION

Core VALUES

People

NSV owns a team of experienced engineers and experts with decades of working in global manufacturing corporations. We are completely confident that we can meet difficult technical requirements in software installation and operation for all customers.

Services

Customers are always NSV's top concern. As a member of the ARGO GRAPHIC Inc. group, NSV is committed to always inheriting and providing customers with the best service experience according to Japanese "Omotenashi" standards.

Partners

NSV is very honored to be selected as a Gold partner of Dassault Systèmes Group. This success is due to the in-depth understanding of the company's products when NSV is one of the first and largest partners of Dassault Systèmes in Vietnam. This also helps us bring satisfaction to customers with advanced solutions.

BUSINESS Areas

NSV operates in the field of consulting and implementing digital solutions for businesses in many different industries. Specifically, we provide software that supports all product R&D stages of businesses such as 3D design, 3D simulation, programming & machining simulation to product life cycle management.

In the field of system integration, with a team of experienced engineers, NSV can confidently advise on the most suitable system solutions for each business.

DESIGN SOFTWARE

Industrial SOLUTIONS

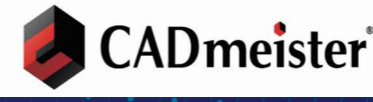

CATIA is the leading solution in product design and development. This software can create complex 3D product models and conduct simulations in real operating environments.

Widely applied in many industries such as aerospace, automobile, and factory design, CATIA supports the entire product development process, helping to shorten development time and bring products to market quickly.

The new version of CATIA integrates the 3DEXPERIENCE platform, bringing many innovative features that enhance collaboration and simplify workflow.

SOFTWARE AND FEATURES PACKAGES	CATIA V5-6		CATIA 3DEXPERIENCE	
	Mechanical Design	Hybrid Design	Mechanical Designer	Mechanical & Shape Designer
Part Design	✓	✓	✓	✓
Sheet Metal Design	✓	✓	✓	✓
Mechanical Systems Design	✓	✓	✓	✓

Product development team collaboration			✓	✓
Remotely access product data on multiple devices			✓	✓
Innovative 3D interface			✓	✓

CADmeister is a high-performance software widely used in industrial manufacturing industries in Japan.

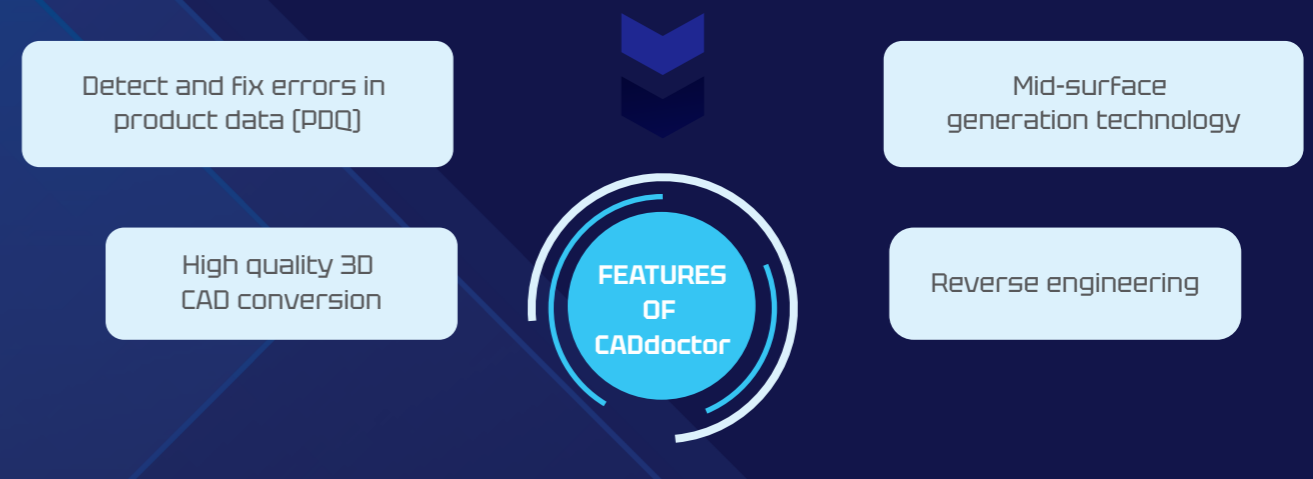

The software has been developed with advanced technology to support design in the CAD, CAM, PRESS and MOLD stages of manufacturing.

STAGE	FEATURE
CAD	CADmeister provides powerful 3D modeling tools such as wireframing, surface modeling, and solid modeling, helping users create complex and detailed models.
CAM	CADmeister's basic software package enables NC data generation to support attached 3-axis, 5-axis and 5-axis machining tools. In addition, the software also provides many flexible processing support features to meet customer needs.
PRESS	CADmeister supports mold design, including three main functional items: design support, modeling support and post-processing support. In addition, this software can also integrate design support features such as simulation and mold analysis.
MOLD	CADmeister can be used for each stage of closed mold design and development such as: initial design creation, cavity and core design, mold model design, detailed design, drawing creation and finalizing data for ordering.

CADdoctor is an excellent tool to optimize and speed up the process of working with your 3D design data.

CADdoctor not only converts CAD data but also provides the ability to detect and correct geometric errors, simplify data, and improve data quality in preparation for subsequent processing steps such as preparing to create FEA mesh.

MACHINING & MANUFACTURING SOFTWARE

DELMIA is digital production management software integrated with the 3DEXPERIENCE platform of Dassault Systèmes, helping to optimize production systems and processes.

Help your company identify production gaps that need to be fixed and address them before they occur.

Adapt quickly to changes in production and customer requirements.

Plan, monitor and control all your production processes.

Promote collaboration and lean manufacturing to increase efficiency and reduce waste.

CAM-TOOL

CAM-TOOL is a specialized software of C&G System Inc. from Japan, helping to solve complex requirements in the mold manufacturing industry.

The software provides integrated NC programming and surface modeling techniques, allowing users to create toolpaths in a "Safe & Unattended" manner, ensuring excellent surface finish quality for high-speed machining or milling of hard materials.

FEATURES OF CAM-TOOL

Superior toolpath creation method

Automatically detects unmachined areas or surfaces

"Smoothing" feature for perfect processed products

Library of standard tools & racks from Japanese manufacturers

Since 1988, **CGTech's VERICUT** software has been the industry standard for CNC machining simulation to detect errors, potential collisions, or areas of machining inefficiency.

VERICUT allows you to reduce or eliminate manual NC programming testing, reducing the loss of defective products and rework. The program also optimizes NC programs to both save time and produce higher quality surfaces.

Optimize time for the machining process

Optimize cutting force for cutting tools to increase tool life

Compare the simulation results with the machining process

FEATURES OF VERICUT

Check simulation of machining process on CNC machine

SIMULATION & ANALYSIS SOFTWARE

SIMULIA provides software solutions for simulating complex physical models, including kinematics, structures, fluids and optimization.

This software helps manufacturing businesses speed up the process of evaluating the performance, reliability and safety of materials and products before putting physical prototypes into production.

SIMULIA SOFTWARE PACKAGE

SOFTWARE PACKAGE	FEATURE
Abaqus FEA	Abaqus FEA is a structural simulation software package from SIMULIA. It uses the "Finite Element Analysis" (FEA) method to model effects on solid structures and materials.
CST Studio Suite	SIMULIA CST allows simulation of electromagnetic wave propagation and signal strength related to the design and positioning of devices for communication and detection.
Simpack	Simpack is multi-body dynamics software, often used to simulate the motion of mechanical and mechatronic systems, especially in the field of car and aircraft manufacturing.
Wave6	Wave6 is a unique sound and vibration simulation engine that allows you to efficiently and accurately simulate noise and vibration across the entire audio frequency range.
xFlow	xFlow is a Lattice Boltzmann particle-based CFD technology suite used for high-precision fluid dynamics applications, especially in modeling moving parts and multiphases.

JMAG is simulation software for the design and development of electrical equipment. It accurately models complex electromagnetic phenomena in a variety of devices such as electric motors, transformers, voltage regulators, and magnetic control systems.

JMAG SOFTWARE PACKAGE

SOFTWARE PACKAGE	FEATURE
JMAG Designer	The software uses the FEA method with an intuitive interface and accurate modeling technology, integrating many result parameters. Users can flexibly evaluate the properties of design ideas by adjusting the shape, materials, and driving conditions.
JMAG Express	JMAG-Express is an electric motor design tool that calculates motor efficiency and provides design tables. The software allows all design changes to be reviewed at any time, similar to reviewing a design memo.

PRODUCT LIFECYCLE MANAGEMENT - PLM SOLUTIONS

3DEXPERIENCE®

3DEXPERIENCE is a comprehensive platform that helps businesses better understand and easily manage all their business activities.

This platform is not just a database storing information, but also a safe space for people to connect and work together. From developing ideas to creating new products and services, everything is managed and implemented easily on this platform.

Integrated with the **3DEXPERIENCE** platform, **ENOVIA** is a Product Lifecycle Management (PLM) solution that directly benefits everyone in the business through flexibility and powerful collaboration features. With an easy-to-use interface and highly secure data management capabilities, **ENOVIA** is not only reliable but also powerful, helping businesses quickly access and make the most of their resources.

ENOVIA SOFTWARE PACKAGE

SOFTWARE & FEATURE PACKAGE	ENOVIA 3DSwymer	ENOVIA Collaborative Industry Innovator	ENOVIA Project Planner
Task & project management dashboard	✓	✓	✓
Store and view 3D data	✓	✓	✓
Interact & discuss with community features	✓	✓	✓
Create sketch ideas with 3DSketch	✓	✓	
Collaborate with product development team		✓	
Manage work, changes, and problems in product development		✓	
Access product data remotely across multiple devices		✓	
Plan project			✓
Manage tasks in the project			✓
Monitor project progress and performance			✓

TRAINING & CERTIFICATION

TRAINING IN USING CAD/CAM/CAE SOFTWARE FOR BUSINESSES

At NSV, we are proud to be the leading training center for solutions from Dassault Systèmes and other partners. Our courses are designed around a flexible, customized learning path based on the specific needs of each business. Whether you are interested in 3DEXPERIENCE® Platform, CATIA, CADmeister, SIMULIA or JMAG, we offer a wide selection of courses that best suit your business environment.

01

EXAMINATION ORGANIZATION AND CERTIFICATION FROM DASSAULT SYSTÈMES

After each training course at NSV, students have the opportunity to take an exam to receive a certificate. If they complete the test requirements, your corporate students will receive a certificate demonstrating their skills in using Dassault Systèmes software.

This certificate is valid domestically and is also recognized globally, increasing the opportunities for application engineers when applying for jobs. This also helps improve the reputation and quality of human resources in your business.

02

System Integration SOLUTIONS

HARDWARE DISTRIBUTION

The team of experts at NSV has experience in the field of hardware distribution, we are committed to bringing you top products from reputable manufacturers around the world.

SOFTWARE DISTRIBUTION

We take pride in being a reliable partner, providing customers with leading software solutions from reputable manufacturers around the world.

IT SYSTEM INSTALLATION CONSULTATION

NSV will advise and recommend the optimal IT system for businesses, based on the actual needs of each customer. After that, NSV's experienced experts and engineers will support customers in implementing the system, according to the agreed plan.

IT SYSTEM MAINTENANCE

We are not only a software provider, but also a reliable care and maintenance partner. Our services include periodic testing of network systems, servers and workstations to ensure stable and safe operation.

Our team of experts checks everything from system stability to network security and ability to recover after failures.

Our commitment is to keep your system running stably and safely, minimizing the risk of incidents and ensuring business performance.

SYSTEM SECURITY SOLUTION

1. ENDPOINT SECURITY - EPP & EDR

Trend Micro Apex One™ provides not only antivirus, but also malware detection and endpoint monitoring. This product suite can be expanded with related applications such as mobile endpoint protection, endpoint encryption, and network and server vulnerability protection.

Trend Micro Vision One is a threat defense platform that includes: Extended Detection and Response (XDR) capabilities to collect and correlate deep operational data across multiple layers such as email, endpoint, server and network.

2. EMAIL SECURITY

ASE | Attack Simulator via E-mail

ASE is a solution that helps test users' security awareness by sending a fake attack email.

- Compose and send simulated attack emails to users.
- From there, find users who have low awareness of network security.
- Offer appropriate online lessons to improve security awareness for users.

3. CHỐNG THẮT THOÁT DỮ LIỆU - DLP

Data Leak Management (DLP), also known as data loss prevention, is a solution to prevent loss of control of an enterprise's important business data information. NSV is currently providing leading solutions to help businesses classify, secure and control data access.

4. ĐÁNH GIÁ BẢO MẬT HỆ THỐNG

Platform & Web Diagnostic: Security vulnerability diagnosis is a solution to identify, quantify and localize vulnerabilities in an organization's IT system. Early detection of system vulnerabilities will help businesses prevent cyber attacks or minimize damage when attacked by hackers.

BUSINESS

Partner

We are extremely proud to cooperate with a diverse range of partners, creating a specialized network to provide excellent services to customers. We not only place the highest priority on user experience, but are also dedicated to exploring and meeting all of our partners' technical requirements. Our mission is not only to provide solutions, but also to create great experiences and real value for each customer.

Notable CUSTOMERS

Why CHOOSE US

TRUST OF CUSTOMERS

We take great pride in being a leading partner, having long-term partnerships with more than 200 businesses with pioneering vision and desire for digital transformation in Vietnam. Together with NSV, we have created breakthrough solutions and brought sustainable value to customers.

ATTENTIVE & DEDICATED CUSTOMER SERVICE

Customers are always our top concern. At NSV, we focus on improving the customer experience in every daily task regardless of large or small scale. Our ultimate goal is to provide an absolutely satisfying customer experience.

EXPERIENCED TEAM OF EXPERTS

Our mission is to accelerate the digital transformation of your business. To do this, NSV has been constantly using all possible resources to develop the technical team's capacity in building the latest software and processes.
